FOREWORD

<u>The Real Book in B Flat</u> is the first transposition book of its kind. It offers the horn player the luxury of on-the-spot sight reading without having to transpose.

In keeping with the standard set by its parent, <u>The Real Book</u>, the B flat <u>Real Book</u> has been re-edited** to insure accuracy of the transpositions. In an effort to give even more to the horn player, the editors have carefully omitted as many as fifty tunes considered to be non-essential horn charts and replaced them with over one hundred charts more essential to the horn player.

As with <u>The Real Book</u>, the B flat Real Book has been professionally copied and printed, with all two-page tunes facing one onother. Also the composer of every tune is listed, and in most cases examples of recordings on which the tune can be found is listed as well.

<u>The Real Book in B Flat</u> was a long time coming, but now it has finally arrived, accurate, neat, ond ready to be smoked. The editors sincerely hope you will have many hours of musical enjoyment playing from the B flat Real Book.

^{**}The very first printing of the <u>Real Book in B Flat</u> (one hundred copies) was sent to the press immediately after the manuscript was finished. Thus the book was edited by the copyist alone. The copyist turned out to be human, and humans do make mistakes. Since the book has now been re-edited by the publishers, this, the <u>FIFTH EDITION</u> is the most accurate book of its kind. So Enjoy!!
